

## KONI SPECIAL ACTIVE FOR 2015-2019 FORD MUSTANG

KONI is pleased to offer our new Special ACTIVE Technology for the 2005-2019 Ford Mustangs with both struts and shock absorbers; as well as suspension kits with Eibach lowering springs. First introduced as part of the 2018 KONI Activate the Nation Tour, the muscular and sporty Mustang is an excellent platform to showcase the technical capabilities of KONI's Special ACTIVE product line with patented Frequency Selective Damping (ACTIVE Technology) that offer superior handling control without compromising comfort.

The popular Mustang's taut suspension is much improved thanks to KONI's Special ACTIVE and now provides sharper handling responses and better tire grip while simultaneously refining the ride comfort. Especially, on rough road surface bumps, seams, patches, etc... Special ACTIVE is compatible with the Mustang's factory equipped springs as well as Eibach Pro-Kit lowering springs.

Brand/Model	Year	Front P/N	Rear P/N	Kit P/N
