

KONI'S ADJUSTABLE AND ACTIVE TECHNOLOGY NOW AVAILABLE FOR MERCEDES SPRINTER

Introducing KONI Special adjustable shocks and KONI Special Active, the next generation of premium shock absorbers that offer superior handling without compromise. It is the latest advancement in the KONI product portfolio. Utilizing the most recent generation of KONI's patented Frequency Selective Damping technology, it controls large body motions and cornering forces but smooths expansion joints and rough roads for improved comfort. Both Special Adjustable and Special Active are now available for the popular Mercedes Sprinter W906 and W907 vans. Drivers and passengers alike will experience unsurpassed comfort and handling around the tight corners and over the roughest roads.

Frequency Selective Damping

KONI Frequency Selective Damping patented technology is the first premium no-compromise shock absorber in the world. Frequency Selective Damping offers superior performance handling when installed on an original equipment (OE) suspension or when matched with other performance upgrades without degrading ride quality for cars and light trucks, SUVs, motorhomes, and service vehicles while improving grip and safety in daily driving. KONI Frequency Selective Damping automatically adjusts to road conditions as well as driving style, all within a fraction of a second guaranteeing greater stability, control and driving pleasure. As with most KONI products, KONI Frequency Selective Damping also carries a lifetime warranty.

About KONI

As a part of ITT Motion Technologies, KONI develops, manufactures and markets high performance shock absorbers for many types of private and commercial vehicles including street and racing cars, trucks, buses, RVs and military vehicles as well as railway rolling stock. ITT Motion Technologies is the world leader in the development and production of brake pads and friction materials for the transport and automobile industry.
